TO STAND OUT

57% have a master's degree

9% have an MBA

REACH YOUR POTENTIAL

What everybody needs to know

For this role, you don't need to have loads of IT technical skills, but you need to understand them, their functions and how they impact each project.

Project Management Qualifications:

PRINCE2® Scrum PMP

IT Qualifications can include Microsoft or Cisco certifications while those from a support background may have CompTIA, or equivalent, certification.

INSIDER TIP

PIOTR JEZIORSKI
Michael Page

Due to the low threshold for entry into this role, there are a lot of people in the market that you will be compared to. Any technical competence will make you stand out from the crowd. It is worth gaining at least a basic knowledge of, for instance: infrastructure, database, or software development. You might consider the first CompTIA course for this purpose.
